Happy Holidays from all of us at BTI Communication Group

Enjoy time with family and friends and while you celebrate, you can rest easy knowing that BTI is still monitoring your equipment and will be there with 24/7 support.

Highlights and Successes of 2019

We want to thank all our clients for their business!

2019 was a record year for the stock market and for BTI and its clients, too. Not only did we see our highest ever revenue this year, but we helped clients with an increasing variety of technologies. Each time, our goal to deliver the foremost level of technical quality that can be delivered resulted in a client win, and a win for us, too, so thank you!

From premise to cloud and back again, to data center servers and switches, to biometric iris access control scanners, to 700,000 square feet of secure Wifi coverage, to solar powered and wirelessly connected cameras packed with analytics, we mastered many new technologies in 2019. We are thankful for these opportunities.
